investigator Harold Deap interviewed
William Crawford, former executive officer
of the CIA station at Atsugi, Japan
concerning his knowledge of LHO and
the military intelligence that LHO may
have possessed from his military assignment
as Radio-radar operator at the Atsugi
Naval Airbase.

Crawford advised that he did not
know LHO and never heard the name
until after the assassination of J.F.K.
The U-2 program administered by
the CIA at Atsugi did not have
their own radio-radar facilities. The
U-2 planes utilized the naval base
communications for only for take-off
and landing clearance.

intelligence ~~resources~~ ^{resources} were handled by ~~per~~ case officers stationed elsewhere in [Japan¹³].

The cover story for the U-2 plane at Atrugi was that it was used to monitor radio activity in the atmosphere. In fact the plane actually ^{had} equipment installed to measure radio activity. To facilitate the cover story, ~~when the~~

Oswald would have seen the U-2 take-off and land at the base however he would have ^{had} no other information.

Radar operators would not be able to trace the U-2 ^{over} ~~the~~ flights. The plane would take off in the opposite direction. The U-2 would ~~start~~ fly to a staging area (Peshawar, Pakistan) before going into the flight plan for the over-flight. However the Russians were aware of the over-flights from the beginning of the program 1955. The Russian did not have the ability to shoot the U-2 down at the altitude of the U-2 flight.

CIA recruited personnel for the program from the military service. The pilots would resign from their respective service units with the understanding that at the completion

of the program they would go back without losing service time and at a rank comparable to their contemporaries. All program employees were paid by CIA. General maintenance on the U-2 was provided at Ahsugi however major overhaul was made only in U.S.

Although the program was directed and administered by the CIA, the commander of the Ahsugi program was Col. Marion "Hack" Nixon from the Air Force.

The program was terminated in 1960.
